

Health and Safety Policy. Last Amended March 2020

At **Zero Degree AC Limited** health & safety is a very important issue to us that is why all our engineers are fully qualified & trained with regards to current health & safety standards set by City & Guilds.

Zero Degree AC Limited complies with all industry air conditioning standards & current construction regulations.

Zero Degree AC Limited services conform to UK & European environmental legislation as well as requirements related to the Energy Performance of Buildings Directive & the Safe Handling of Refrigerant Gases. We are also a member **REFCOM** (Register of Companies Competent to Handle Refrigerants)

All old air conditioning units & systems are taken away & disposed of correctly under FGAS regulations.

Our company is committed to providing a quality service implementing the safest measures in a working environment. We have full public liability insurance and cover our staff for indemnity also.

We regularly make checks to equipment such as ladders and on-site equipment to ensure they are safe for usage.

Our staff are adequately trained to city and guilds standard Level 2 minimum. We ensure RAMS are carried out where necessary to eradicate risks or minimise them at least.

Staff carry essential PPE such as gloves, hard hats, gloves and harnesses including first aid kits. Where necessary if asked to do so staff will comply with masks on site if asked.
